C; Comment: This inhibitory fragment, released from native ITI after limited proteolysis
first domain interacts weakly with PMN-granulocytic elastase and not at all with pancres
C; Comment: The amino acid at position P2' (228-Met) appears to determine the specificity
nd elastase; those with leucine interact strongly.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      A; Note: sequence extracted from NCBI backbone (NCBIP:107966)
C; Comment: This inhibitory fragment, released from native ITI after limited proteolysis
first domain interacts weakly with PMN-granulocytic elastase and not at all with pancrea
C; Comment: The amino acid at position P2' (19-Met) appears to determine the specificity
d elastase; those with leucine interact strongly.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              A; Reference number: A90685; A; Accession: A01210
